

Octave Controls

Key	Menus	In-game
WASD	Pick option	Aim
F, G	Select, confirm letter	Hit ▽ notes
R, T	Back, delete letter	Hit △ notes
Y	Confirm high score name	Pause

If you have a controller like a fightstick, I recommend mapping F and G to the bottom row of buttons and R and T to the top row of buttons. The GCS arcade cabinet uses the same mapping.
